ABOUT ME

Specialized in software and technology quality, with solid experience as a Test Analyst (QA) in startups and consulting companies. Proficient in automated testing, with expertise in Cypress, Jest, and Selenium, ensuring the delivery of high-quality platforms to users. Experienced in creating unit, functional, and non-functional tests, bug documentation, and effective collaboration in agile teams.

Bachelor's degree in Computer Science from Vila Velha University (UVV), fluent in English with basic knowledge of Spanish. Driven by a constant search for technical improvement and a passion for innovative solutions, contributing to ongoing professional growth.

On the soft skills front, excel in effective communication, teamwork, and problem-solving, which are crucial in collaborative and fast-paced environments. Detail-oriented, adaptable, and proactive in continuous learning and improvement, ensuring thorough testing processes and high-quality outcomes.

PROFESSIONAL EXPERIENCE

Company: Namastex Labs

02/2025 - Currently

A.I Engineer

Reports focused on the enhancement of Langflow components, including user experience analysis related to artificial intelligence, QA reporting, and providing assistance and support to new Langflow users.

Company: Software Mind

06/2024 - Currently

QA Automation Engineer

Responsible for creating and automating test cases for various platform implementations and routines. Involves maintaining and developing automated tests in Cypress, as well as building tests in Playwright for refactoring the existing Cypress pipeline. The company follows an agile methodology, using Jira, and we work in sprints to deliver high-quality solutions.

Some of my responsibilities are:

- Creating test cases for new implementations and platform routines
- Automating test routines using Zephyr Scale
- Maintaining and developing automated tests in Cypress
- Designing and implementing automated tests in Playwright for refactoring the existing pipeline
- Collaborating in agile teams using Jira and working in sprints to plan and track activities
- Actively contributing to continuous improvement of QA processes within the agile methodology

Company: Octuspay

10/2023 - 06/2024

Jr Test Analyst - (QA)

Play the role of QA at a startup, responsible for documenting the system's main routes and ensuring the delivery of a high-quality platform to users through functional and non-functional testing. Additionally, contribute to the creation of automated and unit

tests for the application.

Some of my responsibilities are:

- Creation of automated tests in CYPRESS
- Continuous integration pipeline maintenance with GitHub Actions
- Creation of unit tests in JEST
- Creation of test cases and test scenarios
- Bug documentation
- Functional and non-functional tests

Company: ETAURE

04/2023 – 10/2023

Jr Test Analyst - (QA)

Sought to improve expertise and face new challenges by starting an internship at a company led exclusively by a senior QA. In this environment, enhanced skills in automated testing using Cypress and Selenium, while also developing and expanding prior knowledge. Collaborated with the team to identify and implement continuous improvement strategies, benefiting from the learning acquired during this experience.

Some of my responsibilities are:

- Documentation, planning and assistance from the QA team
- Survey of process flows and requirements
- Creation of automated tests in CYPRESS and SELENIUM
- Creation and maintenance of continuous integration pipeline with Bitbucket
- Bug documentation
- Creation of test cases and test scenarios

Company: CONEXOS Consulting & Systems

06/2021 – 02/2023

Jr Test Analyst – (QA)

Gained knowledge in software testing and business operations at a technology company. As a Quality Analyst (QA), responsibilities included planning and developing test cases, creating test scenarios, documenting tests and the platform, running functional and non-functional tests, analyzing requirements, writing bug reports, and automating test cases using the Ghost Inspector tool.

Some of my responsibilities are:

- Creation of test cases and test scenarios
- Bug documentation
- Web Test Automation with Ghost Inspector
- Functional tests
- Non-functional tests
- Exploratory testing and regression testing
- Black box testing

ACADEMIC EDUCATION

Postgraduate In Data Science & Machine Learning: Data Management Technology

XP Educational | 03/2024 - 01/2025

Bachelor's Degree in Computer Science

Vila Velha University (UVV) | 01/2019 - 12/2023

CERTIFICATIONS

- ISTQB Certified Tester Foundation Level (CTFL)
- Create and Manage Cloud Resources
- End to End Testing with Cypress
- CCNA: Switching, Routing, and Wireless Essentials
- QA Career Training: processes and test automation
- CCNA: Introduction to Networks
- Complete Java: From Scratch to Professional
